

Art in CASO / OSAKA

22-26 OCTOBER 2003

Art fair of 17 contemporary art galleries, coming soon.

A second "ART in CASO," that is aiming at high-quality art fair, will be held this year as well by following over 4,000 attendance record in five days and great responses of many medias than we expected from last year show. Although museums, biennale, and triennale have been places to introduce contemporary art to the world since 1990's, art galleries should contain not only a

business aspect, but also be a place to create social and public art space as their base. We hope that the second art fair is going to be a place for as many people to understand various aspects of art galleries and be an opportunity to enhance social recognitions of contemporary art.

*There is going to be a cafe in front of CASO for visitors to gather.
